

THE EMBODIMENTS OF THE INVENTION IN WHICH AN EXCLUSIVE
PROPERTY OR PRIVILEGE IS CLAIMED ARE DEFINED AS FOLLOWS:

Sub A' →

A closed circuit television observation system, comprising

at least one wired video camera and at least one wireless video camera,

at least one monitor having a plurality of channels, and at least one video port coupled to at least one channel for connection to the wired video camera, and

a wireless receiver having at least one channel for receiving a video signal from the wireless video camera.

2. The closed circuit television observation system of claim 1 in which the wireless receiver has a plurality of channels for receiving video signals from a plurality of wireless cameras.

3. The closed circuit television observation system of claim 2 in which the monitor comprises a quad splitter for dividing the monitor display into four segments, each segment displaying a video image corresponding to a different video camera.

4. The closed circuit television observation system of claim 3 in which one of the segments displays a video image corresponding to a wireless camera, comprising switching means for sequentially switching the wireless receiver between wireless cameras.

5. The closed circuit television observation system of claim 3 in which the monitor comprises circuitry for outputting the video image displayed on the monitor to a processing appliance.
